

## **Royal Cargo Trailers Laundromat Trailer**

8.5 x 24 trailer, easily transportable with most pick up trucks.

6 front load 3.5 cubic feet washing machines down road side wall. Front load washers use ½ the water volume of top load washer models.

Fresh water fills and gray water hauls cut in half when compared to units using top load washers.

6 size – matched dryers down curb side wall, each conveniently located directly across the aisle from a washing machine.

Dryers vented out exterior wall directly behind each appliance.

¾ HP pump located under cabinet work station.

Exterior bladders and liners provided to supply fresh water and hold gray water.

Exterior hose systems designed for quick set up and tear down.

White aluminum walls and ceiling and rubber non-skid flooring provide for easy clean up and sanitary maintenance.

Load leveling stabilizer jacks standard under all four corners of unit.

Unit designed to run off generator (not provided), 110 on washer side, 220 on dryer side. Electrical panel mounted on front wall.

All 110 interior wiring run in surface conduit for easy access.

Four fluorescent lights installed in ceiling over laundry area.

Egress windows installed in both curb side and road side walls above appliances.

Three roof vents in ceiling.

48” door over curb side wheels.

Drop down ramp door at rear of unit for easy entry.
